SAFETY DATA SHEET

In according 3rd revision GHS

Revision Date: 9 August 2017

Section 1 – Identification

Product Name: B1101
Product Type: Homo Polypropylene
Product Use: Extrusion Blow Molding and Sheet Extrusion Process
Manufacturer: IRPC Public Company Limited
299 Moo. 5 Sukhumvit Road, Amphur Muang, Rayong THAILAND
Emergency Call: +66(0) 38 802560
Website: www.irpc.co.th, www.irpcmarket.com

Section 2 – Hazards Identification

Classification according to Regulation (EC) No. 1272/2008 (CLP) and GHS Classification:
This product is not classified as dangerous according to Regulation (EC) No 1272/2008 and GHS

Pictogram: Not Applicable
Signal Word: Not applicable
Hazard Statement:
- 
Precautionary Statement:
- 

Section 3 – Composition / Information on Ingredients

Section 4 – First-aid Measures

**Skin Exposure**
If molten material comes in contact with the skin, cool under ice water or a running stream of water. Do NOT attempt to remove the material from the skin. Remove could result in severe tissue damage. Get medical attention.

**Eyes Exposure**
If molten material should splash into eyes, flush eyes immediately with fresh water for 15 minutes while holding the eyelid open. Get immediate medical attention.

**Inhalation**
Move the exposed person to fresh air. If breathing is difficult, give oxygen. Get medical attention if breathing difficulties continue.

**Ingestion**
No first aid procedures are required. Seek medical attention if a significant amount is swallowed.

Section 5 – Fire-fighting Measures

**Suitable extinguishing agents**
Dry chemicals, foam, water, carbon dioxide and halon. Avoid using direct streams of water on molten burning material.

**Hazards during fire-fighting**
Carbon monoxide, carbon dioxide, original monomer other hydrocarbon oxidation products. Carbon monoxide, carbon dioxide, original monomer other hydrocarbon oxidation products.

**Protective equipment**
Wear self-contained respiratory protective device.

Section 6 – Accidental Release Measures

**Personal precautions**
If molten material, avoid breathing vapors.

**Environmental precautions**
Discharge into the environment must be avoided.

**Cleanup**
Collect spilled material using a method that minimizes dust generation (e.g., wet methods, HEPA vacuum). Place waste in an appropriate container for disposal. Allow molten material to solidify before disposal.

Section 7 – Handling and Storage

**Handling**
Avoid dust generation. Handling of pellets may form dust. Filter and ventilate dust where necessary.

**Storage conditions**
Store in a cool, dry, well-ventilated area or silo away from sources of heat, flame and sparks. Ventilate enclosed storage areas, such as trailers and railcars, before entering. Have emergency equipment for fires and spills readily available.
Section B – Exposure Controls / Personal Protection

Exposure limits:

Personal protective equipment

Respiratory protection: No special respiration protection is normally required.

Eye protection: Chemical workers goggles recommended.

Protective clothing: Gloves required when handling hot material. In case of fire, wear MSHA/NIOSH approved self-contained breathing apparatus or equivalent and full protective gear.

Ventilation: Provide adequate ventilation when processing material at elevated temperatures.

Other protective equipment: Ensure that eyewash stations and safety showers are proximal to the work-station location.

Engineering Controls: For molten materials: Provide mechanical ventilation; in general such ventilation should be provided at compounding/converting areas and at fabricating/filling work stations where the material is heated. Local exhaust ventilation should be used over and in the vicinity of machinery involved in handling the molten material.
Section 9 – Physical and Chemical Properties

- **Appearance**: Colorless pellets
- **Odour**: Odourless
- **Boiling Point**: Not Applicable
- **Flash Point**: Not Applicable
- **Melting Point**: 130-170 °C
- **Vapour Pressure**: Not Applicable
- **Auto ignition temperature**: Not Applicable
- **Solubility**: Insoluble in water
- **Viscosity**: Not Applicable
- **Upper/Lower flammability or explosive limit**: Not Applicable
- **pH**: Not Applicable
- **Relative density**: Not Applicable
- **Specific Gravity**: Not Applicable
- **Partition coefficient: n-octanol/water**: Not Applicable
- **Decomposition temperature**: Not Applicable
- **Explosive properties**: Not Applicable

Section 10 – Stability and Reactivity

- **Stability**: This material is considered a stable thermoplastic, with no chemical reactivity under normal ambient and anticipated handling conditions of temperature and pressure.
- **Condition to Avoid**: Avoid temperatures above 300 °C.
- **Material to Avoid**: Avoid solvents and oxidizing agents.
- **Dangerous decompositions**: Carbon dioxide, carbon monoxide, hydrocarbons, dense smoke.

Section 11 – Toxicological Information

**Acute Toxicity**

</table>

- **Irritating/corrosive effects**
  - **Eye Irritation**: Solid particles may cause transient irritation from mechanical abrasion.
  - **Skin Irritation**: Molten material may cause thermal burns.
  - **Inhalation**: Process fumes may cause irritation.
  - **Ingestion**: May cause a choking hazard if swallowed.
Section 12 – Ecological Information

**Eco-toxicity**: No relevant studies found.

**Persistence and degradability**: This material is not expected to be readily biodegradable.

**Bio-accumulative potential**: Insoluble in water. Not expected to be bio-accumulative.

**Mobility in soil**: No relevant studies identified.

**Other adverse effects**: Not expected to pose a significant ecological hazard.

Section 13 – Disposal Considerations

**Disposal methods**: This material may be recycled if unused, or if it has not been contaminated so as to make it unsuitable for its intended use. Shelf life considerations should also be applied in making decisions of this type. Note that properties of a material may change in use, and recycling or reuse may not always be appropriate. Dispose of by burial in a land-fill specifically licensed to accept chemical and/or pharmaceutical wastes or incineration in a licensed apparatus (after admixture with suitable combustible material) Decontaminate empty containers. Observe all label safeguards until containers are cleaned and destroyed.

Section 14 – Transport Information

Section 15 – Regulatory Information

**US Toxic Substances Control Act**: All components of this product are on the TSCA Inventory.

**European Inventory of Existing Commercial Chemical Substances (EINECS)**: The components of this product are on the EINECS inventory or are exempt from inventory requirements.

**Canada – WHMIS**: This product does not meet WHMIS classification criteria.

**NFPA – USA**

Health: 0  Flammability: 1  Reactivity: 0

**HMIS**

Health: 0  Flammability: 1  Reactivity: 0
